

Nalo I Kahoolawe

By AJ P.

One day in Maui it was Kayden's birthday. He was happy because he was 17 and he got to go fishing in the small motorboat. His younger brothers wanted to go with him. The entire morning was spent packing to go fishing and getting the bait from the shop.

Kai was still not ready to go fishing because he brought a lot of stuff on their adventure such as candy, fishing gear, and gear for the motorboat. They were finally ready to go fishing but they got stopped by their father because he said, "You guys will have to wait till tomorrow."

The next day came and they were finally ready to go fishing. Kayden got onto the boat and tried to turn on the boat while Kian and Kai got all the stuff onto the boat.

Once Kayden started the motorboat then they were off on a cool adventure. 30 minutes later, Kian was getting mad because he couldn't catch a fish, but Kai caught 8 big fish with his cool fishing pole and net.

When they were about to go back to their dock, a big wave hit them into a big rock that flung all of them off the boat and scratched Kian on the leg. Kian and Kai were swimming to the island of Kahoolawe until Kian saw Kayden drowning.

Kian grabbed Kayden and the boat to shore while Kai was looking where they were. Kai investigated his bag and saw that some of his stuff was gone. He saw that the motor of the boat was leaking gasoline into a nearby stream that went into fresh water.

All of them ran to the cave because it was raining super hard but then they saw 4 sets of eyes in the cave. They all ran from the cave and saw a big pig run out of the cave and try to hit Kai, but it missed and hit the tree instead of Kai's legs.

They all ran to a mountain that had a crater in the middle of the mountain. They grabbed some apples from an apple tree and put them into Kai's backpack to save for later.

They tried to make a base by a cave, but that cave had the same big pig as last time, so they ran away again.

Kai was scared that they would never go back home to Maui, but Kayden wasn't scared because he finally saw a good place to stay. He saw a house made of wood in an open field with other houses made of different kinds of materials and saw people riding horses.

They ran to a man that was on a horse and Kayden said, "Where are we?". He told them that they were on the island of Kahoolawe and this is the village of Ki'ilawe. We are people from the big island, and we got here from a crashed boat on the west side of the island.

The Man said his name was Albert and he has tried to get off the island using wood and rocks but no use because of the big wave that always blocked them. Kai told all of them that he had some supplies in his backpack and Kian said that they have a motor but it's kind of broken.

Kian ran out of the village with Albert and tried to pick up the motor, but it was too heavy. Albert called his friends to help them, and it was easy because there was a lot of them.

They carried it back to the village while Kai and Kayden looked at the supplies and thought about what they should make. Kayden got an idea and told Kai what to make to get off this island with everyone.

Meanwhile their dad was scared because they haven't come back since this morning. He grabbed his favorite boat and started going out into the deep. He tried to look around and saw his motorboat without the motor on an island. While he saw a big wave about to hit him, so he sped around the rocks and went all the way to the island without a scratch on the boat.

He ran into the forest with his machete, and he started looking for footprints. He saw Kian carrying the boat with the other people and said, "Stop right there". Kian looked back and saw his dad and started running to him to give him a huge hug. The dad said, "where is your brothers" Kian said that they are at the village making a boat to get off this island the dad said, "who are these guys" Albert walked to him and said to him hi.

Kian and all his friends got to the village. Kian ran to his brothers and a big boat. Kai started to walk to the engine until he saw his dad with his motorboat. Kayden looked at the engine and thought that it wouldn't be enough to push the boat over the wave so they would have to think more. Albert had an idea about using paddles to go over the wave and it could be easy because they had a lot of people to paddle. Kayden thought that it was a great idea to do that, so he grabbed some logs and started chopping the wood with some axes. Kian measured the height of the wave and Kai created a stronger engine.

They pushed the boat to shore and started paddling with their hands and paddles. Kai turned on the engine and their dad pulled them up the wave, but they have forgotten about Kai's candy, so he got sad, but they had to go. They made it past the rocks except some of Kai's materials dropped from the bag because it ripped again, and the engine's fuel was

running out, so Albert dropped the paddle and put some fuel into the cannister.

They made it over the wave finally after they were stuck on the island for 9 hours without food. They got to the island of Maui and said bye to the strangers that were going to the big island. They were so happy that they were back home because they finally got to do their favorite fun attraction and that was parasailing, and they got to go to the Movies.

But they still had to do their chores for 1 hour because they must make up for the boat, they broke. After they finished their chores, they finally got to go somewhere to eat.

They would never want to go to Kahoolawe again because it is dangerous there. There are stray pigs, horses, and big waves and sharp rocks. They were excited because they finally got to do something awesome other than doing survival stuff. They didn't know how to do it, but they were surprised that they did survive on Kahoolawe.
